TO WHOMSOEVER IT MAY CONCERN

This is to inform that Khejilen Pakkiri, 2.4 yrs/M, a case of Cerebral Palsy has been recommended Neuro Regenerative Rehabilitation Therapy along with Integrative Therapies at our hospital under Dr. Alok Sharma.

The treatment protocol involves a 14-day hospital stay during which time he will be extensively evaluated clinically. This will be followed by a Bone Marrow Aspiration from which subsequently the mononuclear cells were isolated. These are hemopoetic mononuclear cells which is injected intrathecally through a lumbar puncture and CSF catheter. This will be followed by comprehensive rehabilitation program which includes physiotherapy, occupational therapy, speech therapy, psychological counseling, genitourinary rehabilitation. From second week onwards, Integrative Therapies will be customized as per the diagnosis and patient requirement. It will include the following: Ozone Therapy, HBOT, Deep Tissue Mobilization etc. and Specialty Consultations during the stay.

The cost of the treatment is USD 13,900/- for Deluxe room accommodation, preoperative investigations, transportation 14 days.

- * Approximate charges which could be subject to change in future.
- * Postoperative medicines and medical assistive devices are not included in the package.
